

## Technology Readiness Assessment

The following questions are loosely designed to allow your school to evaluate the current environment in terms of how well you are technically and culturally prepared for implementing a fully automated learning environment.

- What percent of computerization is used for Grades 9. 10. 11. 12?
- How many subjects utilize electronic text books and in what grades 100%, 80%, 50%, 30%, 0%?
- Are computerized grading systems used, if so, which system, and are parents privy to the information within FERPA guidelines?
- Is a learning portal available on the school website?
- Are any Learning Management systems currently in use: If so, which subjects are taught and percentage of content?
- Which teacher(s) currently uses an LMS in their classroom and who defines/manages/quality assures the content?
- Do teachers routinely use Microsoft Office apps or other computer applications in the delivery of services?
- Are students required to submit coursework using Microsoft office or other digital tools?
- Are STEM strategies currently in play? If so, who is responsible for curriculum alignment. What is the percentage of STEM integration per grade and are the measurable objectives and measuring systems in place?

- Are formalized post-secondary vocational preparatory systems in place?
- Are formalized college preparatory systems in place?
- What online tools are utilized for ACT/SAT preparation or simulations?
- What system(s) is/are used to assess which professional track a student is best suited?
- Are there structured remediation strategies aligned with the delivery of services?
